DETAILED ACTION

1. This Office Action is responsive to the RCE filed on 07/21/04.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 30-58 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 30 recites the limitation “a delta code, wherein said delta code specifies pulse characteristics relative to at least one non-fixed reference, wherein said pulse characteristics define communication **channels**”. This limitation is not disclosed in the specification.

Dependent claims of the above claim are therefore also rejected.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation “**said** at least one pulse characteristic relative to said at least one non-fixed reference”. This limitation is lack of antecedent basis. It appears that the limitation should be changed to --said pulse **characteristics** relative to said at least one non-fixed

Art Unit: 2631

reference-- in order to be consistent with the previously recited “pulse characteristics relative to at least one non-fixed reference”.

Dependent claims of the above claim are therefore also rejected.

Response to Arguments

6. Applicant's arguments filed on 7/21/04 have been considered. The claims rejections to claims 1, 5, 8-18, 22,23, 29, 30, 34, 37-45, 51, 52 and 58, as being anticipated by Rybicki et al (6,212,230) are now withdrawn since the claims 1 and 30 were amended to overcome the rejection. However, claims 1-58 are not allowable with reasons set forth above in this Office Action.

Conclusion

7. Reference (5, 610,907), (6,430,208), (6,330,233), (6,331,997), (6,636,556), (6,160,802) and (6,204,810) are additionally cited because they are pertinent to the claimed system/method.
